

QRARI (pronounced cue-rah-ree) is our unique, patented marker that lets you deliver augmented reality (AR) content to your audience without asking them to download an app to their phone first.

Print this out and try it for yourself with the QRARI marker below.

1. Open your camera app
2. Point it at the marker
3. Tap the URL that appears
4. Allow the browser to access your camera
5. Keep phone pointed at the marker.
